Transient Killed Boarding Freight

Edhardt Hanson, 25 years of age, transient laborer, met his death in the Didsbury railway yards Tuesday morning while attempting to get on board the freight train passing through town.

Near the south end of the depot platform he threw his pack on a tank car and attempted to board the car, but fell clear of the train. He made a second attempt and caught the rear of the coach and was thrown under the wheels of the train. The train was brought to a standstill and it was found that both the man's legs had been amputated. Dr. J. L. Clarke was called and the man was removed to the hospital, where he died soon after entering.

The man had been around here for some time and had been paid off the same morning, mailing his money to himself at Calgary. He intended to return to that city via the freight train.

The local coroner, Dr. Clarke, empaneled a jury, who, after viewing the remains adjourned the inquest until next Tuesday. The members of the jury are Messrs. Ad-head, Gooding, Hugst, C. E. Reiber and C. Bellamy.

I.O.D.E. Notes.

Mons Chapter I.O.D.E. met at the home of Mrs. J. A. McGhee on Monday, October 2nd, when arrangements were completed for the annual dance, which will be held Thursday, November 23rd, and an art exhibition to be held in the Leuzler Block on Saturday, November 18th. The Chapter would be grateful for the loan of handicraft or antique exhibits for this event. Any resident of the district having such is asked to communicate with members of the Chapter, or the secretary.

CARD OF THANKS

Mr. Sam McAllister thanks all his neighbors and friends for the work they did and the kindness they showed him during the illness from which he recently recovered. During a very busy season and with much of their own work, they saw that the work on his farm did not suffer during his incapacity.

Inter-School Track Meet.

A very successful and largely attended track meet was held at Bowden on Friday last. There was a very large field of competitors in all events, and the full program of 14 events was run off in record time.

Trisfail was successful in winning the highest number of points, with an aggregate of 135. The other towns were: Bowden 103, Crossfield 86, Carstairs 78, Olds 45, and Didsbury 35.

With regard to the Didsbury school, no information has been received here as to the number of medals which may come to competitors of this school.

The outstanding athletes of the day were Margaret Fitzpatrick, of Crossfield, in the girls' classes, and Jackson (Canadian) and Hanson (Olds) in the boys' events, with I. Berscht and A. Brusso starting in the sprints.

KNOX UNITED CHURCH NOTES

In connection with the visit of the Rev. Robert Laird, D.D., Toronto, Treasurer of the United Church of Canada, to the West, the Presbytery of Red Deer has arranged for a meeting to be held in the Olds United Church on Friday, 13th October at 8 p.m. at which Dr. Laird will speak and trusts that the members, and especially office-bearers of the United Church, will make an effort to be present to greet Dr. Laird.

The Harvest-Home celebration will take place, in connection with Westcott and Didsbury United Church on Sunday and Monday, October 15th and 16th. Harvest thanksgiving services will be at Westcott on Sunday at 2 p.m., when special music will be rendered and the service conducted by the Minister, and at Didsbury at 7:30 p.m., when the Minister will preach. Members of the Westcott choir will provide the music. Grains, fruits and vegetables for decoration of the church should be in early Saturday afternoon. On Monday the Ladies Aid will put on a Harvest-Home Supper in the Didsbury church, followed by a meeting at which the Rev. G. W. Kerby, D.D., Calgary, will speak.

Mr. Carl Gebert is on the Berscht staff again.

LOCAL & GENERAL

Mr. and Mrs. Herman Hawkes motored to Edmonton for the holiday.

Miss Kathleen Pitt, of the Calgary Normal School, spent the weekend at her home here.

Miss Nelda Hugst visited her sisters, Misses Alea and Dorothy at Edmonton over the weekend.

Mr. and Mrs. R. Hamlett, of Calgary, spent Thanksgiving at the home of Mr. and Mrs. J. W. Halton.

The ladies of the Eastern Star wish to sincerely thank all those who helped to make the waffle supper Saturday evening such a success.

Mr. Rodney Munson, of Vulcan, a former resident of this district, was renewing acquaintances here last weekend.

The local flour mill shipped a truckload of flour to the Prairie Bible Institute at Three Hills on Tuesday.

Miss Edna Bishop left last week for Drumheller, where she will be the guest of her sister, Mrs. F. R. Smith, for the winter.

Kept in mind the big second annual O.E.S. Dance to be held in the Didsbury Opera House on Wednesday, October 25th. (41c)

Dr. and Mrs. Sawdon, of Three Hills, visited with Mr. and Mrs. Troyer on Monday and drove with them to Mr. Peter Johnston's for Thanksgiving dinner.

Miss Annie Currie and Mr. Bob Gulliver, who are students at the Calgary Normal School, spent the Thanksgiving holiday with their parents here.

Mr. and Mrs. Ward Keith and Mr. and Mrs. Jack McCloy drove out to Hunter Valley on Monday. They report that a small quantity of gas has been struck at the oilwell which is being drilled at that place.

Messrs. A. G. Studer, T. Johnson, J. Kirby and C. Reiber went on their annual Thanksgiving hunting expedition in the Sylvan Lake and Rimbye district. They report some good shooting and came home with a big bag of birds which included prairie-chickens, spruce partridge and Huns. They spent the night at the Studer cottage at Sylvan Lake. We learn that one of them got so excited that he returned home minus his hat.

LOCAL & GENERAL

We are sorry to hear of the illness of Mrs. A. G. Studer, who is now a patient at the Didsbury Hospital.

Mr. Howard Evans, of Lacombe, spent Thanksgiving with his parents Dr. and Mrs. W. G. Evans.

Miss M. Fisher, of Calgary visited with her parents, Mr. and Mrs. A. O. Fisher over the weekend.

Miss Margaret Ranton, of Lacombe, spent the Thanksgiving holiday with her parents here.

Mrs. James Service, of Brooks, Alta. is spending a few days with her aunt, Mrs. A. Brusso.

Mr. and Mrs. Tom Morris and Mr. Jim Morris paid a visit to Calgary on Tuesday.

Mr. and Mrs. Robert Gibson left Tuesday evening for Vernon, B.C., where they will visit with their daughter.

Mr. Harvey Shantz made a trip to Leader, Sask. last week and brought back a load of furniture for Mr. Hank Wall, of "Hank's Place."

Miss Edith Mitchell and Mr. Gene Mitchell, of Calgary, spent Thanksgiving with their parents, Rev. and Mrs. A. J. Mitchell.

Messrs. Wesley Reed and Jim Nesbeth, of Calgary, and Mr. Mac Hercheb, of Chipman, Alta. visited at the Harry Pearson home over Thanksgiving.

Archie Boyce has arranged for a community sale to be held Saturday, October 21st. List what you have to sell with C. E. Reiber. (39c)

The annual Harvest Home and Thanksgiving Service will be held at Zion Evangelical Church next Sunday morning. The subject of the sermon will be, "The Reason for Thanksgiving," and in the evening, "God's Arithmetic."

Federal Loan is Half Subscribed.

At noon on Wednesday, subscriptions to the \$225,000.00 Refunding Loan had reached a total of \$125,000.00 it was estimated by Hon. E. N. Rhodes, minister of finance.

While it was stated at the loan headquarters that official figures would not be available until late Wednesday night, it is now quite definite that the loan is well past the half-way mark and rapidly approaching complete success. Both cash subscriptions and Victory loan conversions are pouring in from all parts of the country, it is stated. The loan is strictly limited to \$225,000.00.

Although cash subscriptions are subject to allotment "it now seems probable that it will become necessary to close the books earlier than some investors have anticipated," said an official statement from loan headquarters.

Wonderful Display At Builders Hardware

The ladies of Didsbury were treated to a wonderful display of dinnerware and fancy dishes, when Mr. R. W. Walsh, representative of the famous Wedgwood and other English potteries, exhibited his entire range at the Builders Hardware Store on Saturday last.

The showroom was thronged all day with visitors and everyone was delighted with the beautiful display of all the latest designs and patterns in dishes and fancy goods.

Mr. Sprelman was well pleased with the response to the invitation to attend this showing and stated that this annual display is enlightening people as to the quality of the goods that can be obtained locally.

The beautiful berry dish which was given away in the evening was won by Mrs. Matheson.

The International Wheat Agreement

In this column last week reference was made to the speech delivered by Premier Bennett on his return to Canada from the World Economic Conference and International Conference of wheat exporting and importing nations. Important facts, figures and general information affecting the world wheat situation were presented, all of which had a bearing upon and led up to the entering into of an agreement by twenty-one nations vitally interested either as exporters or importers of wheat designed to advance the common interests of all.

Inasmuch as there is no one question of more vital importance to the people of Canada, and more particularly of Western Canada, than wheat, we propose to supplement last week's article by a further reference to the subject. Statistics compiled covering a long period of years go to establish the fact that when the wheat producers of the world are prosperous—that is, when the price of wheat is high enough to return a fair profit to the farmers raising it—industry generally throughout the world is likewise prosperous. In other words, wheat is shown to be the barometer of prosperity. Naturally so, because it is the standard food of the great bulk of the human race.

First, we recite the terms of the new international wheat agreement: The chief wheat exporting nations, that is Canada, Australia, Argentina and the United States, agreed to limit their combined exports of wheat in the crop year August 1, 1934, to July 31, 1935, so that the total world exports of all countries shall not exceed 560,000,000 bushels. Of this amount Canada's export allotment is 200,000,000 bushels.

These four countries further agreed that during the following crop year August 1, 1934, to July 31, 1935, they will limit their exports of wheat to maximum figures 15 per cent. less than the average yield and average acreage sown during the 1931-32 season.

The minor wheat exporting countries, that is Bulgaria, Hungary, Roumania and Yugoslavia, agreed to limit their combined wheat exports in both the crop years 1933-34 and 1934-35 to 50,000,000 bushels.

While Russia entered into no definite agreement as to restrictions on either production or exports it did agree to enter into further negotiations governing exports.

On the other hand, the importing countries:

- (1) Agreed not to encourage any increase in the area sown to wheat in their respective countries.
- (2) Agreed not to take any governmental measures the effect of which would be to increase the domestic production of wheat.
- (3) Agreed to adopt every possible measure to increase the consumption of wheat.
- (4) Agreed to the removal of measures which tend to lower the quality of breadstuffs, and thereby decrease the human consumption of wheat.
- (5) Agreed to lower their customs tariffs on wheat when the world price reaches and maintains for a specified period an average fixed price.

Finally, an international Wheat Advisory Committee was set up, representative of both exporting and importing countries, to watch over the working and application of this agreement.

Such is the new international agreement governing future wheat production and export. It is one concrete outcome of the World Economic Conference. Whether it will prove practical in operation and satisfactory in its results time alone will disclose.

It involves the expense of less wheat on the part of Canada than was hitherto the case in normal years. Consequently, it involves the raising of less wheat, and the putting of a stop to further increases in wheat acreage and production. For the crop year 1934-35 this reduction is set at 15 per cent. below the average yield of 1931-32.

Admittedly, the Dominion Government can restrict exports to any figure it may like. That is entirely within its control. But how can that Government limit production? In the United States it is being attempted by paying a bonus to farmers to reduce their wheat acreage, the said bonus to be paid out of a fund created by imposing a special tax on all wheat consumed in the United States. In other words, compensation is being offered the U. S. farmer. It is reported from Ottawa that this idea does not meet with favor nor find much support there.

It is further reported from Ottawa that the Federal Government does not intend to apply any compulsion to limit about a 15 per cent. reduction in wheat acreage, but will rely on an educational campaign among farmers designed to encourage and bring about a voluntary reduction by them. Will the farmers respond? And if of certain farmers are willing, and certain farmers are not, what will the result be? If one farmer reduces 15 per cent. and another increases 15 per cent. the country will be in exactly the same position. If one set of farmers decline to reduce 15 per cent. even if they do not increase their production, it means that another set of farmers would have to reduce 30 per cent. in order to bring about an average 15 per cent. reduction.

Then, it is to be noted, that the 15 per cent. reduction in 1934-35 is to be from the average yield and acreage sown in 1931-32 inclusive. But tens of thousands of Western farmers and millions of acres of land produced little or nothing in these years. They must be allowed to produce as largely as possible in 1933-34 and 1934-35 in order to recoup their heavy losses in these disastrous years. If they are to do so, and at the same time the total production is to be reduced by 15 per cent. it seems inevitable that those farmers who had fair crops in the period 1931-32 must decrease their future production by very much more than 15 per cent.

And what, it will be asked, is to be done with the acreage taken out of wheat production? Can our farmers be asked to work it and allow it to lie fallow? They cannot afford to let it run to weeds. Will the result not be to devote it to other grains with the inevitable result of large surpluses of such grains over and above domestic and export demands?

Without attempting to speculate on the effect which weather conditions will inevitably have on the success or failure of the proposed plan of restriction, and without any attempt to forecast the future of wheat production, question arises: If production is not decreased while at the same time restrictions from Canada are restricted, and as a consequence surpluses pile up on the farms or huge quantities are built up in the elevators, what will be the effect of such surpluses have upon the world price? It is admitted that our present large carry-overs have depressed and continue to depress prices. What hope is there of a rise in international prices, and a consequent lowering of tariffs by importing countries, if available wheat supplies are not limited to demand?

Summer Complaint Plays Havoc With the Bowels

Few people escape an attack of summer complaint. It may be slight or it may be severe, but both the young and the old are liable to it during the summer months. You cannot tell when it strikes you how it is going to take its toll. Let it run for a day or two and see how weak and prostrate it will leave you.

On the first sign of an attack of any looseness of the bowels take a few doses of Dr. Fowler's Extract of Wild Strawberry and see how quickly it will give relief.

Manufactured only by The T. Millburn Co., Limited, Toronto, Ont.

Carnivorous Plants

Trap Insects With Lightning-Like Rapidity In Snapping Maws

New light was cast on mysterious workings of the snapping maws of carnivorous plants, Prof. F. E. Lloyd, president for 1932-33 of the Royal Society of Canada, in his presidential address to the botanical section of the British Association for the Advancement of Science, presented his observations of some 75 species of the bladderwort—a type of plant that snatches its food from air or water. The professor of botany at McGill University, Montreal, contributed a highly technical paper which he labelled a conjunction of his review of carnivorous plants.

The address set out the details of the structure of the "door" which the flesh-eating aquatic or terrestrial plant slams shut on such unfortunate small insects as may come wandering within reach. Super-speed-motion pictures, Prof. Lloyd related, had disclosed the hungry bladderwort opened the fatal door in 1-100 second and closed it in 1-10 second, completing the whole operation inside 1-10 second, included in the 75 types in which the professor presented his paper. Lloyd's summary was the purple bladderwort found growing in the vicinity of Montreal.

3 MONTHS ON BISCUITS AND MILK

Woman's Digestive Troubles

Everyone who is subject to any form of indigestion should know of this woman's experiences. Advice from one who has had such severe attacks is advice worth having. She writes:

"I suffered from indigestion, gastritis and constipation, and was so very ill, I had (on medical advice) to live on soda biscuits and milk for three months. Well, a friend advised me to take Kruschen, and now I am pleased to say my troubles are ended. I can now enjoy a good meal without any painful after-effects, my skin is clearer—in fact, quite clear—and there is no sign of constipation. I would advise anyone suffering the same to take Kruschen." (Mrs.) M.R.L. The immediate effect of the 63 salts in Kruschen is to promote a natural flow of the digestive and other vital juices of the body. Soon after the first meal with Kruschen you will find that you are able to enjoy your food without any distressing after-effects. And as you persevere with the "little daily dose," you will see that the relief which Kruschen brings is lasting relief.

Old Newspaper Changes Hands

Selkirk Record Was Founded 48 Years Ago

The Selkirk Record, weekly publication founded 48 years ago by the late James Stuart, is being carried on by his son, Robert, has been sold by his daughter, Mrs. Margaret L. Coleclough, to Charles A. Crowder, who has been a member of the Record staff for the

past ten years, and W. H. G. Taylor. The management of the paper has been in the hands of Mrs. Coleclough for six years, owing to her father's illness, part of the time, and his active engagement with another newspaper enterprise in the eastern part of the province. The new owners announce a policy of independence in politics.

Should Have Foreseen Slump

Expert Thinks Managers of Banks Were "Extremely Blind"

Managers of central banks throughout the world were "extremely blind" in forecasting the approaching depression some years ago, the royal commission on banking was told at Toronto. It did not follow that it was impossible to secure a Canadian of sufficient ability and vision to head such an institution in Canada.

This viewpoint was expressed by A. J. Gushenok, special lecturer in banking at the University of Toronto, in answer to questions by Sir Thomas White, a member of the commission.

Where Phonographs Are Barred

Phonographs have been barred from Yemen, in Southeast Arabia. The Imam has ruled that anyone having one of the sound producers will be dealt with severely. He also has issued another law imposing a tax on every man who shaves his beard.

Up-Side-Down Flying

Italian Ace Describes Feeling In Three-Hour Trip

Sitting in a Chicago hotel, breakfasting on a muskmelon and coffee, Lieut. Tito Falconi told of his experiences in making a new world's record for upside-down flight. His latest wrong-side-up flight was from St. Louis to Joliet, Ill., a trip that took three hours and seven minutes because of the slow speed rate that this type of flying requires.

"It's a swell feeling when you turn upright again," said Falconi. "It's like getting well after you've been sick."

Asked if a sensation of dizziness overtook him, "the swarthy little Italian ace replied, 'Ah, no. The only sensation is one of pain because of the constant weight on one's shoulders. In this method of flying the pilot is held in the ship by straps which fasten around the shoulder, and the sensation felt is the same one gets from carrying say, a 150-pound weight in a basket hanging from the shoulders.'"

The most thrilling experience in Falconi's career, he said, was had on this trip when his right safety strap gave way about an hour out. He was dropped half way out of the cockpit, his goggles were torn off by the terrific wind, and he was unable to see. An added peril was the fact that he did not wear a parachute, its weight being too great a handicap in the suspended position.

Egypt Buys British 'Planes

Said To Be Used In Fight Against Drug Traffic

A firm in Manchester has received an order from the Egyptian government for ten aeroplanes of the Avion 620 type. The type is a development of the "Tutor" type, an order for 200 of which was placed with the firm a year ago by the British air ministry, on the fulfillment of which the Newton Heath works are still engaged.

The type is one on which pilots can be trained in every branch of military flying, including blind flying and bombing.

It is reported that the machines are to be used in the Egyptian government's fight against the drug traffic. The machines are admirably adapted for long-distances patrol work, and have machine-gun, wireless and photographic equipment, and each carries a pilot and a navigator.

Gas In The Stomach

Gas in the stomach, belching, sour water brash, pain after eating, etc., can be overcome within three minutes if you will take a little Bisulphate of Magnesia in water or carry it out. The ordinary Bisulphate of Magnesia which you can get at any drug store will correct acid stomach and stop acid indigestion immediately. Try it and see.

Ready For Distribution

Saskatchewan Salt From Simpson Well Piped On Market

The first shipment of Saskatchewan salt, taken from the Simpson salt well, is ready for distribution. More than seven years ago a company drilled for oil and about two years ago secured a salt brine deposit. The brine is being vaporized into salt by the Simpson Oil Company.

A well is being drilled about one and a quarter miles east of the salt well, where it is hoped to tap gas, to be used at the salt well for vaporization. With the profits from the salt the company will continue its search for oil in a field that geologists have said has good possibilities for the discovery of oil.

Tea Restriction

Protection Afforded Tea Grower Results In Higher Prices

In April a restriction was placed on tea exports from Ceylon, India, and Java, in order to raise prices to growers, who for almost four years, had been suffering devastating losses. Higher prices have resulted, not only of the gardens, but also here on our own markets, and many package teas already cost more than they did six months ago. Some of the finer quality brands are as yet unchanged, however, and are, consequently, even better value than at last April.

All's Well That

Smokes Well

All's well with the pipe, all's well with the smoker when Ogden's Cut Plug is lit and drawing well.

Ogden's Cut Plug is a downright fine tobacco . . . cool, mellow and satisfying . . . made for the pipe, made to pack right, to light right and to smoke right. See what a difference it will make in your pipe!

OGDEN'S CUT PLUG

If you "roll your own", use Ogden's fine cut cigarette tobacco and Chanticleer cigarette papers

Taking Second Place

The time-honored onion has finally lost its grip on Bermuda. Agricultural statistics for 1933 show that for the first time the Bermuda onion is playing second fiddle to other vegetables in number of crates shipped from the island. Tomatoes leading by a score of 30,881 to 23,861. Carrots also passed onions this year with a grand score of 21,890 crates.

Saskatchewan wheat is the world's greatest wheat growing province.

Professor Drummond Sees No Chance Of Making Profit From Canada's Basic Industry

"Any person who looks for a profit from farming in 1933 should have his head examined," Prof. W. M. Drummond, of the University of Toronto, declared at the Liberal-Conservative summer school at Newmarket, Ont.

"There has been so much said since 1932 about the fundamental importance of a prosperous agriculture in this country, of the absolute impossibility of anybody in Canada being prosperous without Canada's farmers being prosperous that one would have thought the major interest of reformers with any materialistic ambition would have turned towards the formulation of a policy calculated to guarantee the utmost in the way of a prosperous agriculturist," he went on.

"The fact that such has not been the case leads us to the conclusion that most of the statements concerning the great importance of agriculture in our national life were never intended to be taken seriously."

The reformer who would improve the farmer's lot was almost certain to throw up his hands in despair after really looking at the task in hand, Professor Drummond said.

The very nature of farming prevented curtailment of production to meet a falling market, he asserted. The farmer, in his bargaining contracts, was usually in the position of the non-union laborer seeking work from an employer of many thousands of men.

While prices might drop, he said, costs usually remained at the same old level. A correspondingly large portion of the income has to go to the covering of fixed costs, while at the same time falling prices stimulated the farmer to produce more in order to attempt to cover his costs.

The profession of the farmer, Prof. Drummond held, was as dignified as was necessary. Much of the farmers' trouble could be traced to the opinion held by many city dwellers that the man of the soil was not any too bright.

"We must see to it that the stigma is removed and that the farmer himself is equipped with a proper pride in his work. Unless we do we are only admitting implicitly when we talk about an intelligent and prosperous agriculture population."

A Wonderful Record

Cow At Woodstock, Ontario, Acclaimed As Greatest Holstein

At Woodstock, Ont., is a cow named Springbank Snow Countess which is acclaimed as the greatest Holstein on record. That record is, indeed, awe inspiring. During her lifetime this cow has produced 9,977 pounds of butter, approximately 200 cubic feet. Molded into conventional bricks this would make a line three-quarters of a mile long, or a wall five feet high and nearly 99 feet long. It is enough butter to spread on 691,200 slices of bread, making the generous allowance of half a cubic inch to a slice. That many slices of bread would cover two entire football fields, including end zones, and there would be enough left over to cover two-thirds of another field. It would pave ten 200-foot blocks of a street 38 feet wide. The milk this cow yearly produces is enough to supply more than a score of children with a quart every day.

It is truly a wonderful record. Detroit Free Press.

Nearest Thing He Knew

She shut off the gramophone and turned excitedly to her father.

"Dad," she exclaimed, "that is the latest kind of jazz record. Did you ever hear anything so wonderful?"

Father, who had been trying to read his evening paper, grunted.

"No," he replied wearily. "I can't say I have, although I once heard a collision between a wagon load of empty milk cans and a farm-cart filled with ducks."

Nearly twice as many bananas are being shipped from Guatemala, French West Indies, as a year ago.

Good Amateur Sprinter

Prince Of Wales Beaten Only By Inches In Race

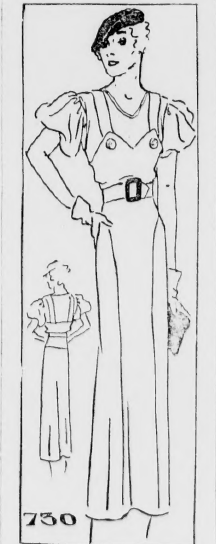

England's 38-year-old Prince of Wales may be a poor horseman, but he has just revealed himself to be an amateur sprinter of considerable merit.

Competing in the Old Comrades' races at the Welsh Guards annual sports at Windsor Barracks, the prince, who is colonel-in-chief of the regiment, was beaten only by inches after starting from scratch in the 100 yards flat race, was seventh to much younger men in the 100 yards handicap for officers, and second in the 50 yards backwards race for men and women.

The races were not exactly up to Olympic standards, and most of the competitors ran in everyday long trousers and walking shoes, but the events were contested in great style, with the prince a leading figure.

By Ruth Rogers

INTEREST IN WIDENED SHOULDER LINE RESULTS IN DARTING PUFFED SLEEVES

Develop this modish youthful dress in one of the new shades of soft crinkly crepe silk and you will love it. Grey, beige, Eleanor blue, etc., being extremely popular.

And while it looks lovely in plain crepe it also looks exceedingly well in silk crepe of very small prints. For instance, a brown and white scheme giving the effect of a checked pattern, with a brown leather or so material belt can be worn. Make the gumpie of plain white crepe.

Style No. 730 is designed in sizes 12, 14, 16, 18, 20 years, 36 and 38 inches bust.

Size 16 requires 2½ yards 35-inch with 1½ yards 25-inch for blouse. Price of pattern 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Great Weakness Of Canada's Export System

Not Knowing Real Requirements Of British Market

One of the greatest weaknesses in Canada's exporting system is "that we do not always give people what they want in the form in which they want it," Hon. G. Howard Ferguson, Canadian High Commissioner to Great Britain, told a Canadian Club luncheon meeting in Toronto.

"We try to sell them something they have," he said, "it is easier to sell a man what he wants than to try to persuade him that a substitute will do."

Canadian business men, said the High Commissioner, could not do better than send representatives to Old Country to study conditions and learn the requirements.

"We in Canada," he said, "should never forget the fact that 25 per cent. of the people of Great Britain are food producers for whom the task of providing food for 100 per cent. of England's population is an impossible one."

Excess Wheat Production

Problem Result Of Necessity For Supply During War

The problem of excess production of foodstuffs can be traced directly to the necessity of supplying the armies in the world war. World production of wheat in 1932-33, China excluded, totaled 4,125,000,000 bushels. 1929, with Russia also excluded, was 4,011,000,000 bushels. In 1932-33 a sharp reduction in yields in the United States was chiefly responsible for the lower total of 3,760,000,000 bushels with Russia and China excluded. Semi-failures of crops in the last two years removed Russia temporarily as an exporting factor. Meanwhile Germany, Poland, Australia, Canada, the Argentine and some of the Danubian countries notably increased their wheat acreage. If and when Russia re-enters the world markets, there is in prospect a wheat glut that may ruin the price structure for any agriculture group on an export basis. Chicago Daily News.

According To Calculation

Normal Man At 70 Has Eaten 700 Times His weight

A healthy man, with a normal appetite, who reaches 70 has eaten 700 times his own weight, according to the calculation of experts at the faculty of Paris. They have figured that in his span of seventy years the average man of 140 pounds would have eaten thirteen tons of bread, fifteen tons of vegetables, seven tons of meat or thirteen whole cows, seven tons of fish, 1,400 pounds of candy and sugar, drink 15,000 quarts of milk and 20,000 quarts of beer, in Europe, or water in America.

Advantages Of Rural Life Offer Attractions To The Town Dweller In Many Ways

Scientists Study Volcanic Ash

Professor Of University Of Saskatchewan Completes Important Research

Professor W. G. Worrester of the ceramic department of the University of Saskatchewan has recently completed an important piece of research on the possible uses for volcanic ash in the field of ceramics, according to a bulletin of the department of railways, labor and industries.

Extensive deposits of volcanic ash have been found in Saskatchewan in the Swift Current district. Other deposits are also known to exist in the Twelve Mile Lake Valley near St. Victor and in the general area known as Wood Mountain.

There has been established at Swift Current a large plant which now produces household cleaners, abrasive products which have volcanic ash as their basic material.

The work so far has proven that within certain limitations the volcanic ash under consideration can be used as a substitute for felspar in a number of ceramic products. It is to be mentioned that at present the discovery is likely to prove of more interest and importance to western Canada than to the more easterly sections, where an abundant supply of excellent felspar is available in all commercial grades.

Epidemic Mytifies Farmers In Trinidad

Natives Think Wrath Of Gods Causing Cattle To Die

A mysterious epidemic of cattle deaths, puzzling superstitious east Indian farmers has broken out in the neighborhood of a deserted old French airport, 14 miles from Port of Spain, Trinidad.

The epidemic believed caused by blood-thirsty vampire bats, has discouraged the natives' belief in the use of inoculation of cattle and the farmers are resorting to the old method of sacrifice to appease the wrath of the gods which they believe are now visiting them.

Shy A Sea Of Flames

Within four hours 3,600 flashes of lightning were counted by an official lightning autograph instrument during heavy thunderstorms in west Germany and the Dutch frontier districts. The instrument was at Nordhorn, Westphalia. In one and one-half hours between 20 and 40 discharges a minute were registered. Observers say that during the four hours the sky was a sea of flames.

FIRST TIGER CUBS BORN IN ENGLAND IN FIFTY YEARS

Our picture shows three tiger cubs born at Walsingham Zoo, in England, on view for the first time. Now seven weeks old, these playful little lumps of striped wool are the first to be born and continue live in England, in captivity, for fifty years. The mother is giving one of the cubs a wash-and-brush-up with her substantial tongue.

(Charles Downing Lay, in New York Herald-Tribune.)

Unemployment and its consequences in reduced rations gives many city people a longing for country life with its constant occupation on the land. Our present circumstances may, therefore, explain the revival, after a quarter of a century, of the back to the land cry, which seems to gain headway in spite of distress and bankruptcy in agricultural communities.

The charms of rural life is always the same; only the counter attractions of the town go up and down in value with prosperity and with depression. In any period, good or bad, a well man can always produce a good living for his family from the soil. Those who love country living are ever looking toward the farm and are not to be deterred by city sneers at muddy boots or dusty cloths or sweaty brows, or by clever remarks about being chambermaid to a cow, for they know well the delight of seeing the milk come home frozen in the pail, the luxury of rich cream and sweet butter.

They know too the ecstasy of spring mornings when they see the sun rise over the hills and have felt the not always silent welcome of the cows and horses when the stable doors are opened at feeding time. They know the voice of their own rooster crowing to the dawn and geese and turkeys when they speak and strut. Though the care of animals is exacting, it is always a pleasant occupation for some people, and the companionship of the dumbest horse means something to the man who works with him. Some men (and women, too), are born stockmen or horsemen. They have the care of animals always be so employed if they could choose. Others take naturally to fruit growing or gardening, and because they have a feeling for growing things they always do their work in the right way and at the right time and produce the finest fruit and the biggest crops.

The two occupations of agriculture and animal husbandry cannot well be separated. The stockman must raise feed for his cattle and the gardener must have a draft animal for work and for the necessary supply of manure, which produced on the farm saves money that otherwise must go to manufacturers of chemicals.

What the farmer produces for his own consumption, he can also sell and buy and has the chance to sell farms to produce all his food and live like a prince if he has a good cook for a princess. Home grown milk, eggs, butter, cheese, poultry, pork, veal and sometimes beef, with vegetables, fruit and flowers in abundance not forgetting a hundred other delicacies like maple sugar and honey give the farmer every requisite for high living and provide the best possible reason for the city man's urge toward rural life.

If the farmer's cellar is full of apples, potatoes, celery, cabbage and other things, including barrels of wine and cider, and if his smokehouse is full of hams, bacon and shoulders, and the pantry shelves are sagging with home-made jellies and preserves in glass, why shouldn't he laugh out loud at the sight of the city man going to the delicatessen for a half-cane of beans or half a roast chicken (and a leghorn at that) and two oranges?

Farm life will always be popular with people who like to live well, and so long as the farm table grows it will be doubly attractive in a depression.

Middle Age Of Year

Thirty days hath September, a month with a little of everything; in it an epitome of the year with its hottest spell of summer often ends at its beginning, a mild threat of winter at its end on the verge of Indian summer, and a souvenir of April somewhere in between, some fresh morning before the first ruddiness appears in the grass and corn and woods, as the year now in its half middle age remembers its youth.

Fire Prevention Week.

The Governor-General has pro-
claimed this week, October 8th to
14th, as "Fire Prevention Week."

The proclamation states that,
"It is shown by reliable statistics
that at least 80 per cent. of the fires
which occur originate either directly
or indirectly through inexcusable
ignorance and neglect, and are
therefore preventable, and that the
exercise of reasonable prudence and
proper carefulness on the part of
responsible individuals, would reduce
the losses by fire in Canada to the
comparatively insignificant propor-
tions of losses in other countries."

The idea of Fire Prevention Week
is to draw the attention of the
public to the underlying causes of
the preventable loss of life and
property by fire, and to the best and
most practicable means for its control.

It is recommended that:

1. All dwellings and their sur-
roundings be carefully inspected by
their occupants, and all condi-
tions likely to cause or promote
the spread of fires removed.
2. All public buildings, stores,
warehouses, factories, be inspected
and cleaned of rubbish, in order
to reduce fire hazards and maintain
health and safety.
3. All hotels, theatres, asylums,
hospitals and other institutional
buildings be inspected and provision
made for all changes necessary
to protect the occupants from
danger in the event of fire.
4. Fire drills be held for the
children in all schools; for the
inmates of all institutions, and for
the employees in all large stores
and factories, in order that a
greater degree of safety may be
ensured by acquainting the occu-
pants with the best and most
expedient mode of exit in time
of danger.

"Kritiks' Korner."

Thanks, "Emanen," for volunteering
to clean up the stove at the
Pioneer Office. We sent the materials
one day last week and note that
the work has been done.

It was necessary for your "Observ-
er" to visit the sister city to the
north one day last week, also the
one to the south. In each instance
as he hopped along through their
streets he was thankful that he lived
in Didsbury. However, let us not
strain our elbows patting ourselves
on the back, for to say that ours
are better is not saying too much.

We are happy to note the opening
of a new place of business. What is
needed today is more ingenuity to
see opportunities for making money
where others thought none existed,
such as this enterprise illustrates.
We wish "Hank's Place" the best
of luck and hope that others will be
encouraged by their example to
create new industries here in town.

We predict a good crop of weeds
for next year, as plenty of them
have been left for seed.

Mysterious Disease Attacks Cattle

Forty head of cattle have died in
the Verdant Valley district, near
Drumheller, from a mysterious dis-
ease. One rancher lost 30 head.

Veterinary surgeons have failed
to diagnose the disease.

WEEKLY SERMONETTE

"The best 'Thanksgiving' is
'Thanks-living.'"

WEEKLY JOKE

A wholesale dealer had a trouble
getting one of his retail customers to
pay his bills. Finally he lost patience
and wrote him a letter threatening
to turn his account over for collection.
The customer was mad, and showed it.
He wrote the wholesaler as follows:

"What do you mean by sending
me such an insulting letter? Every
month I place all my bills in a
basket, and then blindfold my sten-
ographer and have her pick out
as many bills as we can pay. It
just happens that you are unlucky.
If you don't like my way of doing
business I won't even put your bill
in the basket."

Poultry Commissioner

GOVERNMENT OF THE DOMINION OF CANADA 1933 REFUNDING LOAN

The Dominion of Canada offers for public subscription

Two-year 3½% Bonds, due 15th October, 1935

Issue Price: 99.50 and accrued interest,
yielding 3.75% to maturity.

Six-year 4% Bonds, due 15th October, 1939

Issue Price: 99.00 and accrued interest,
yielding 4.19% to maturity.

Twelve-year 4% Bonds, due 15th October, 1945

Issue Price: 96.50 and accrued interest,
yielding 4.38% to maturity.

Principal payable without charge in lawful money of Canada, at the office of the Minister of Finance and Receiver General of Canada at Ottawa, or at the office of the Assistant Receiver General at Halifax, Saint John, Charlottetown, Montreal, Toronto, Winnipeg, Regina, Calgary or Victoria.

Interest payable half-yearly, 15th April and 15th October, in lawful money of Canada, without charge, at any branch in Canada of any Chartered Bank.

Denominations

Two-year Bonds, \$1,000

Six-year Bonds, \$500 and \$1,000

Twelve-year Bonds, \$100, \$500 and \$1,000

Cash Subscriptions

Cash subscriptions will be received only for the Six-year 4% Bonds and for the Twelve-year 4% Bonds. All cash subscriptions will be subject to allotment. Following the announcement of the plan of allotment, delivery of interest certificates against payment in full for the bonds allotted will be promptly effected.

Refunding Subscriptions

Holders of Victory Loan 5½% Bonds due 1st November, 1933, after detaching and retaining the coupon due 1st November next, may, for the period during which the subscription lists are open, tender their bonds in lieu of cash on subscriptions for a like par value of bonds in one or more maturities of the new issue and receive allotment in full with prompt delivery. The surrender value of the Victory 5½% Bonds will be as follows:

100% of their par value on subscriptions for the Two-year 3½% Bonds and the

Six-year 4% Bonds.

100¼% of their par value on subscriptions for the Twelve-year 4% Bonds if effected

on or before 16th October, and 100% of their par value after that date.

No accrued interest on the new bonds will be charged on refunding subscriptions if effected on or before 16th October. After that date accrued interest from 15th October will be charged.

Holders will receive in cash the difference between the surrender value of their Victory Bonds and the cost of the bonds of the new issue.

The amount of this Loan is limited to \$225,000,000.

The Loan is authorized under Act of the Parliament of Canada, and both principal and interest are a charge on the Consolidated Revenue Fund of Canada.

The proceeds of this Loan will retire \$189,971,850 Dominion of Canada 5½% Bonds maturing 1st November, 1933, and \$40,000,000 short-term Treasury Bills. The balance will be used for the general purposes of the Government.

Subscriptions will be received and receipts issued by any branch in Canada of any Chartered Bank and by Recognized Dealers, from whom may be obtained application forms and copies of the official prospectus containing complete details of the Loan. Applications will not be valid on forms other than those printed by the King's Printer.

The subscription lists will open on 10th October, 1933, and will close on or before 24th October, 1933, with or without notice, at the discretion of the Minister of Finance.

Reforestation Work.

Extent of the reforestation work commenced by the forest service branch of the provincial lands and mines department last spring is indicated in a report recently made on the work, which shows that the total number of caragana plants distributed was 685,500; the number of white spruce 7,735, and the number of lead pole pine 360. The seedlings were distributed to individual farmers throughout the province, communities, institutions and schools for the building of windbreaks and beautifying purposes, as well as in an effort to promote development of coniferous growth among the poplar bluffs on farms and elsewhere. The number of individuals to which seedlings were distributed totalled 785, in addition to which 56 schools, 51 institutions and 7 municipalities received material on request.

Alberta Beef to Britain.

Best cattle exports from Alberta to the British market have totalled 3,700 head this year to date.

Provincial Livestock Club Contest.

The annual provincial livestock club contests to decide upon the junior club teams to represent the province in the nation-wide judging contests at Toronto royal fair this fall, will be held at Edmonton on Wednesday, November 1st. Teams will compete from Lethbridge on the south to as far north as Spirit River in the Peace River district.

Tax Consolidation Appeals.

More than 3,500 applications for tax consolidation under the Act authorizing same passed at the last session of the Legislature, have been received, according to Rebt. English, deputy minister of municipal affairs.

Relief Programme.

Considerable progress is reported to date in the carrying-out of the relief programme for the dry areas in the south. Some 65 carloads of feed have already been shipped south, all of this going into the area south and east of Hanna, except 10 carloads for the Pincher Creek district. In these shipments are included about 70,000 bushels threshed oats and barley, the balance being green-feed and hay. Under the arrangement for supply of vegetables at cost to residents of the dry areas, some 24 carloads have already been shipped south and more than 25 additional carloads are on order and will be shipped shortly. Efforts are being made to find winter feeding quarters for commercial livestock and work horses of farmers in the dry areas. Under policy for removal of settlers to new locations, some 289 families have already been removed to various districts in central and northern Alberta, and arrangements are being completed for further removals.

Finishing Alberta Poultry on the Farm.

Putting the finishing touches on the product before offering it for sale yields the greatest proportionate returns of any labor undertaken on the farm. In no case is this more pronounced than with the feeding and finishing of poultry for market.

With this in view the poultry division of the Alberta department of agriculture is undertaking a campaign in certain sections of the province to finish Alberta poultry on the farm by the comparatively simple process of crate feeding or pen feeding for three weeks, using home-grown feeds and carefully grouping and selecting the birds to be fed so that the weaklings are not outdone by the stronger birds in the flock. A great proportion of the poultry now going to market and being placed in Grade 2 or 3 can be put in such condition as to qualify for the top grade and the top price. Market poultry whether sold alive or dressed should always be intended and prepared for market, and for this purpose a systematic crate feeding or pen feeding is essential. Not only does crate or pen feeding increase the weight and improve the condition of the bird, but it also greatly improves the quality of the flesh by softening the muscles, which results in juicy, tender meat when prepared for the table, as compared with tough, stringy, unpalatable meat such as one is sure to get if unfed poultry is roasted in the usual manner.

The final stage in properly preparing poultry for market—killing and dressing—is of great importance. A little carelessness or a little indifference to proper bleeding or plucking, which results in torn flesh or discoloration, will lower the grade of the bird one or two grades.

With a view to concentrating on a definite area between Crossfield and Red Deer the poultry branch of the Alberta department of agriculture is arranging a series of meetings at Crossfield, Carstairs, Didsbury, Olds and Innisfail.

The meetings in the Didsbury district will be held on October 19th and 20th. An advertisement of the meetings will be found in another column. The arrangements are in charge of the U.F.A. locals.

Coal Near Sundre.

The rumor that a commercial seam of coal has been located at a point 15 miles west of Sundre is well founded. Mrs. L. B. Macdonald, who is interested in the claim, has reported to this office that the preliminary work towards opening of the seam is well underway, and that in about ten days' time the mine will be opened to the public. The rumor that the mine was already opened was well founded and many truck drivers have been disappointed on making trips to the mine by having to return without a "tag" of the recently-discovered black diamonds.—Olds Gazette.

WORLD HAPPENINGS
BRIEFLY TOLD

Two military aeroplanes collided in the air at Kielce, Poland, killing four occupants.

T. A. Love, Grand Forks, B.C., was elected president of the British Columbia-Yukon Weekly Newspapers Association.

Robert Van Roolleghem demonstrated at Brussels, Germany, a miniature aeroplane which, he contends, is proof against fire and heat.

Brazil's new "pure coffee" law has become effective and hereafter stores can sell only coffee fresh from the roaster. Ten days old is the limit.

The world Jewish Conference closed its sessions by adopting a resolution calling for a boycott on German goods until the rights of Jews in Germany have been restored.

The radio station at Cameron Bay has been destroyed by fire, it was learned in a radio message received at Churchill. No details regarding the blaze were given. The cause of the fire is not known.

Samuel Driblin, 75-year-old chief engineer of the "Noronic" flagship of the Northern Navigation fleet, has seen 52 years' service on the lakes, his anniversary being held recently.

Discussion of plans for the Canadian Medical Association Convention in Calgary in June, 1934, has resulted in a decision to invite the Prince of Wales to attend as the prince's birthday, June 23, occurs during convention.

Calgary Fish and Game Association has decided to start an investigation of the disease which has killed thousands of ducks in southern Alberta this season, the heaviest toll occurred at Stobart Lake, about 42 miles east of Calgary.

Sir Gilbert Christopher, Viceroy, prominent financier and engineer who acted as industrial adviser to the United Kingdom delegation at the Imperial economic conference held in Ottawa last year, is dead at his home in Birmingham, England. He was 62 years of age.

A Queer Voyage

Trip From England To The Black Sea In Hand Propelled Boat

Collect of many queer voyages attempted in recent years is the trip which two Edmonton, England, men have started with the Black Sea as their goal. Their collapsible boat made of a form of aluminum is operated by pedals and hand propellers. Four knots is the estimated speed of the boat, which weighs about a quarter of a ton. The itinerary is from Southampton, through the Bay of Biscay, past Gibraltar and into the Mediterranean, then along the northern African coast and so on, Vienna is the destination of the boat, but a call will be made at Constantinople, and the return will be by way of the European coast of the Mediterranean.

Scientists Are Puzzled

Have No Theory About Weird Noises Over Yellowstone Lake

Yellowstone Park rangers and scientists are still pondering after 50 years of mystery, over the strange sounds heard over Yellowstone Lake every morning in the late summer. The weird inexplicable noises begin like the muffled sounds of birds in flight with whirring, flapping wings rise quickly in crescendo and end as a sustained note with distinct rhythmic quality.

All theories so far offered for the phenomenon have been dispelled by observations.

Preventing Honey Spoilage

In helping to prevent honey spoilage, the division of bacteriology, Dominion department of agriculture, has evolved a method by which an examination of freshly extracted honey will indicate whether the honey may be expected to remain safe from fermentation within one year.

Finland has ruled that employers must insure domestic servants against accident.

Busy On New Theory

Einstein Pleased With Quiet Refuge On Norfolk Coast

Anybody attempting to molest Albert Einstein in his humble refuge on the Norfolk coast may get bullets from guns of his host's game keepers. And if Commander Oliver Locker-Lampson himself is around, any intruder may have to face the revolver which the member of parliament reputedly is carrying while the celebrated mathematician is under his protection.

Professor Einstein arrived from London fleeing reported Nazi threats against his life, and set about at once in his quiet, tree-surrounded retreat to work on a new mathematical theory, the nature of which was not disclosed.

He said he was not responsible for the "Brown Book" which incurred Hitlerite wrath and which, Nazis alleged, was a compilation of victims of persecution.

Sitting in a small hut in a garden facing the North Sea, the professor looked smilingly content as he puffed his pipe and spoke of the Nazi threat against him.

"All I want is peace, and where could I find a more peaceful retreat than in England?" he asked a visitor.

Gathering Data On Meteors

Observers Will Check Progress During Byrd's Expedition To South Pole

One hundred and twenty sky observers, located at points all over the world, will check the progress of meteors during Commander Byrd's south pole expedition.

Byrd's chief astronomer, Prof. J. Poulter of Mount Pleasant, Ia., has made arrangements for these observation stations, which will form three progressive lines from the north to the south.

One string of stations will extend from Toronto, Canada, to the southern tip of South America. Another will be operated by the British Astronomical Association and will extend from Norway through Africa. The third will start at Tokyo, Japan, and extend through Australia.

The observers will gather data on the speed and direction of fall of the meteors. Professor Poulter will operate the southernmost station of Little America, he said.

Recipes For This Week

(By Betty Barclay)

CHEESE BISCUITS

- 1 cup sifted flour.
- 1 teaspoon combination baking powder.
- 1/2 teaspoon salt.
- 1 tablespoon butter or other shortening.
- 1/2 cup grated cheese.
- 2 eggs milk or water.
- Sift flour once, measure, add baking powder and salt, and sift again. Cut in shortening and cheese. Add liquid gradually until soft dough is formed. Roll 1/2 inch thick on slightly floured board. Cut with small, floured cutter. Bake in hot oven (450 degrees Fahrenheit) 15 minutes. Makes 12 biscuits.

CALIFORNIA PRUNE PIE

- 2 cups cooked prunes.
- 1 orange.
- 1/2 cup brown sugar.
- 1 teaspoon salt.
- 2 tablespoons butter.
- 1 cup liquid from prunes.
- 2 tablespoons cornstarch.
- Baked pastry shell.
- Meringue, flavor-4 with few drops lemon extract (see 2 egg whites).
- Pit prunes and cut in half. Peel orange, removing white inner peel completely, and dice orange. Combine prunes, orange, sugar, salt, butter, prune liquid, and bring to a boil. Dissolve cornstarch in 2 tablespoons cold water, add to meringue mixture and cook until thick. Pour into baked pastry shell, cover with meringue and brown in a moderate oven (350 degrees Fahrenheit) for 15 minutes.

Excellent crops have caused an appreciable improvement in trade in Denmark.

It isn't the cost of getting men into office, but the upkeep that hurts.

Winnipeg Newspaper Union

By Ruth Rogers

VARIOUS POINTS ABOUT THIS SMAR DRESS HAVE BEEN THOUGHT OUT FOR MATRONS

For instance, the one-sided softly falling rever cuts the bodice breadth. Still more helpful perhaps is the unbroken line, created by the partial belt arrangement, which gives height to the figure. The inset panel at the center-front, also does its bit toward slenderness.

Style No. 438 is designed for sizes 36, 38, 40, 42, 44 and 46 inches bust. Size 36 requires 4 1/2 yards of 39-inch material with 5/8 yard of 10-inch lace. Plain crepe silk or sateen in beige, grey, or dark blue.

Price of pattern 25 cents in stamps (coin text is preferred). Wrap copy carefully.

Suggests Debt Settlement

Sir Harry Armstrong Has Idea For Britain and United States

Sir Harry G. Armstrong, formerly Consul-General at New York, has written on the payment of the War debt problem and especially on the debt of Great Britain to the United States. He discusses what is expected by the United States, what is expected by Britain to do, and then he makes certain suggestions as a compromise or at least as a practical suggestion for settlement.

This comprises cutting the amount to about one-fourth its present nominal amount, or \$4,600,000,000 estimated debt to £200,000,000 to be paid in a single sum in sterling gold bonds bearing 5 1/2 per cent. interest, which would be probably cashed in Europe giving the gold to the United States at once. This simply amounts to putting Great Britain through the bankruptcy court and accepting about 22 cents on the dollar, which is usually considered a very good settlement.

When it is considered, moreover, that it takes fully twice as much of British merchandise to pay a dollar to-day as when the debt was contracted, and that all securities and industrial investments have depreciated similarly, such a payment is a very fair one and the creditor is fully justified in asking its acceptance—Hamilton Herald.

Noise Has Been Measured

Some Interesting Figures Given By London Research Station

Noises measured in "decibels" are quoted by the London Stationery Office publication, "Reduction of Noises in Buildings," by the Building Research Station. The following scale for decibels is given:

- 110 decibels are equal to an aeroplane cabin.
- 100 are equal to a printing press, or an express train at 12 feet.
- 90 are equal to a tube train or a pneumatic drill at 20 feet.
- 80 are equal to a typing room or a motor-horn at 20 feet.
- 70 are equal to a "fairly noisy restaurant" or an average busy London street.

60 are equal to an "ordinary room with conversation," or "loud conversation."

50 are equal to a "fairly quiet City office," or an average quiet London street.

40 are equal to an "average suburban house-room," or quiet conversation.

30 are equal to a very quiet room, or an average quiet street in the suburbs.

20 are equal to a whisper at four feet, and

10 are equal to the rustle of leaves in a slight breeze.

It is stated that houses and hotels should range from 10 to 20 decibels (not louder than a whisper at four feet, at the outside). Private offices should be no louder than 20 to 30, here in the City, a quiet office is 50, or twice too noisy; and public offices are allowed between 25 and 40.

Class-rooms should be no louder than a whisper at four feet, allowing for traffic, lifts, rattling windows, and noises off.

The means to get back to these standards include keeping windows shut, making them with tiny panes and mighty frames, using partition walls of bricks nine inches thick, or, alternatively, special substitutes tested by the Research Station demanding quieter "labor-saving appliances" than the market is eager to supply.

Uses Novel Method

King Boris Gradually Getting Better Roads For Bulgaria

King Boris of Bulgaria, ardent motorist, wants good roads for his realm and has found a novel way of getting them.

Every time he drives his car over a bad and bumpy stretch, he notes its exact location, and next day invites his minister of highways and communication to lunch or dine with him.

A royal invitation is equivalent to a command. Trembling, the minister obeys. After coffee and cigars, the king suggests a little ride into the country. The minister has to reply that he would be only too delighted and honored.

Once the bad patch of road has been noted, the monarch takes the wheel himself. Driving at first slowly, he gradually steps on the gas until he is hitting the seventies.

He takes care to see the minister in the back seat, over one wheel. He never looks back to observe the anguished ministerial features. Once the drive is concluded, he turns around blandly and says, "You see, Your Excellency, our roads are not so bad, after all!"

The next day sees a capable work gang mending the offending highway.

C.W.N.A. Officers

Charles Clark, Of High River, Is Elected President

Charles Clark, of High River, Alta., was chosen president of the Canadian Weekly Newspapers' Association at the concluding session of the association's convention at Vancouver. Delegates wound up their business while on a boat trip from Vancouver to Powell River, B.C., 70 miles up the coast.

Directors included: Saskatchewan, Donald Dunbar, Estevan; John Scott, Whitehead; S. J. Dorman, Alameda; Andy King, Rouleau; Cameron McIntosh, North Battleford; Sam Wynn, Yorkton.

If sleep is conducive of beauty some people must suffer from chronic insomnia.

Scotland has a cheaper-gas campaign.

Problem For
British Banks

No Way To Stop Deposits From U.S. Citizens

A large volume of "unwanted" United States money being deposited in banks of the United Kingdom constitutes a problem that so far has defied solution, two prominent United Kingdom delegates to the British Commonwealth Relations Conference said at Toronto.

"The bank rate in England is very low now," Viscount Cecil of Chelwood, chairman of the United Kingdom group, said in an interview, "and one of our chief problems is the flood of unwanted money that is pouring into the banks. These funds, deposited in the main by United States investors, are subject to withdrawal at 24 hours notice and are of little or no value, though it has not been discovered yet how to get rid of them. Their deposit appears to be actuated by a desire on the part of the depositors to find the safest place possible to house their assets."

Viscount Cecil was confident England was on the road to economic recovery. He said a great deal of building was going on throughout the country. Road construction was another feature of development prominent this year.

Expedition To South Pole

Rear Admiral Byrd On Quest Of New Territory For U.S.

With a crew of 70 scientists and adventurers, Rear Admiral Richard E. Byrd, is sailing on his second expedition to the Antarctic.

The aim of the expedition is twofold: To chart and claim for the United States any areas of ice recession about the South Pole, and to determine the extent of deposits of oil, coal and other natural resources.

The aviator and explorer announced his plans to the press, and for the first time the details of the expedition.

"We all feel that the steady recession of ice should have left some 500,000 square miles of land about the South Pole, Byrd said—a trace of excitement in his voice as he talked of his new venture.

The bulk of this land, the explorer said, should be between the South Pole and South America—most of it adjoining Evelyn Byrd Land, named for his mother—which was claimed for the United States on his expedition of three years ago.

Power Of Hypnotism

London Doctor Can Influence One Patient Over Telephone

How he hypnotizes a patient over the telephone was told by Dr. Hubert Carhill, of London, during a lecture in Westminster Hospital. "This patient," he said, "has had to be hypnotized many times. The man has become so saturated with my dominance and so easily amenable to my suggestions that there is no need for him to be in the room. If he were in Paris and I telephoned him he would do exactly as I told him. If you are wise you will not lightly allow yourself to be subjects of hypnotism. It is not worth it. It is a terrible business. Yet in certain conditions people can be cured in a day with the judicious help of hypnotism."

New Use For Radio

Installed As Means Of Communication On Russian State Farms

State and collective farms have grown so large in the U.S.S.R. that something had to be done about communication between various sections. The Institute of Electrification of Agriculture reports that it has installed radio receivers and transmitters on the tractors of one farm near Leningrad and solved the problem. The boys and girls now play merrily along and pass the time away chatting with one another "over a distance of many miles."

Mutual Interests

Two men were travelling on a northbound train. Presently one, hoping to break the ice, asked his fellow traveller:

"What's your line of business?" "It may sound strange," said the other, "but I'm a pepper traveller." The first man threw out his hand. "Shake!" he said. "I'm a salt seller."

A REMINDER!

A few years ago thousands of Alberta farmers petitioned and worked for the building of Alberta Pool Elevators. As a result the Pool system covers the Province in a close network.

The same reasons which inspired grain growers to ask for the service and protection of this co-operative system of elevators suggest that patronage should continue to be extended to them on a generous scale.
